

In order to promote the mobility of students, teachers and non-teachers, to enhance the social dimension of the campus and to support the community, services have been identified and welcome guides have been created.

The guides are designed in three formats:

- a web page, as a point of access in cyberspace;
- a document, organized as a print-friendly flyer, but primarily as an electronically shareable document, with structured text and images;
- a welcome video, aimed at a more agile and fast dissemination of information.

## VIRTUAL CAMPUS

The UNITA Virtual Campus, #UVC, is a large-scale education, research and management information system, designed to provide federated services to a diverse and dynamic academic community.

Based exclusively on open-source technologies, #UVC encourages the development of new features to overcome potential limitations, sharing solutions and inviting new collaborators to solve existing or potential problems with the product.

Its functional prototype focuses on emphasizing its security, flexibility and scalability aspects, both in terms of applications and number of users.

## MATCHING EVENTS

Matching events are an initiative based on short meetings between researchers, professors, administrative staff, with the aim of creating new relationships and sharing ideas and perspectives.

A community-building event,' explains Prof. Marcella Costa, Deputy Vice-Chancellor for International Education, 'which aims to create pathways for double degrees, multiple degrees and joint degrees to foster student mobility between the Alliance Universities and thus contribute to the creation of a European inter-university campus.

### Research and didactic interests

Each participant, after presenting his/her research interests, has the opportunity to meet other researchers/professors in individual discussions.

The meetings allow participants to engage with fellow researchers/professors, imagine new networks of collaboration and lay the foundations for creating international relationships aimed at amplifying the impact of their work within the Alliance.

## RESEARCH

From the 25th to the 28th of October 2022 140 researchers, from the 10 universities of the Alliance, met to discuss around these topics:

- Migration
- European Citizenship
- Health
- Ageing
- Artificial Intelligence
- Green Technologies

## EDUCATION

Over 150 professors and vice-rectors from 12 European Universities joined on the 16th and 17th of March, at the University of Turin, to discuss common policies in order to boost transnational education and to shape together new international curricula for the students of the Alliance UNITA. The aim: implementing the European joint degree.

## DEVELOPING UNITA COMMUNITIES

From the 26th to the 27th of June 2023 at the University of Turin 140 academic and administrative staff of UNITA met to plan future matching events on education and research.

### First results of the Matching event:

Enhanced mobility between research groups: PhD candidates and researchers are already planning visiting period in the partner universities

### GREEN PHOTO CONTEST

The impact of climate change  
on our environment

The importance of organizing UNITA competitions in each location of the alliance's partners has been essential to contributing to a more connected community and to a stronger connection between our physical campuses, especially in the aftermath of the pandemic.

Moreover, the fact that these contests have been organized following a democratic process of concept proposals involving the **UNITA Students Assembly**, followed by a selection at alliance level, illustrates the important role of students in community building actions, as well as a deeper degree of integration in the consortium

#### OUTCOMES:

- long-term impact beyond their initial objective (the photo contest will be followed by an UNITA itinerant exhibition of the winning photos in each partner university and the exhibition will involve the university libraries as locations for showcasing the photos; the environmental cleaners contest has offered the context for developing long-standing partnerships between the UNITA universities and local initiatives dedicated to a more sustainable local environment/campus.
- stirred interest in the UNITA campuses and communities and will become recurrent activities of the alliance.
